

Sales Manager KPI Standards

Vault Group — KPI structure, Sales Plan, measurement,
and accountability rules for Sales Managers.

This document establishes the structure of KPIs and the Sales Plan for a Sales Manager, the measurement procedure, and the accountability scale for non-performance. The actual numeric values (plan targets and KPI quotas) are set in a monthly Order of the Head of the Sales Department and are not fixed in this document.

01 General Provisions

1.1. Purpose

This document establishes the structure of the KPIs and the Sales Plan for a Sales Manager, the measurement procedure, and the accountability scale for non-performance. The actual numeric values (plan targets and KPI quotas) are set in a monthly Order of the Head of the Sales Department (Section 2) and are not fixed in this document.

1.2. Scope

The document applies to all employees in the role of Sales Manager, including those acting in the role on a temporary basis.

1.3. Measurement Principles

1. All metrics are pulled automatically from Zoho CRM based on data entered by the employee in line with the underlying **Zoho Ecosystem Usage Regulation for the Sales Department**.
2. If CRM data does not match reality, the corresponding metric is treated as failed regardless of the employee's actual performance.
3. The measurement period depends on the metric (day / week / month). The final reckoning of the Plan and of violations is performed on the 1st business day of the following month.

1.4. Two Independent Accountability Tracks

Non-performance triggers measures along two **independent** tracks (Section 7):

- **Sales Plan** — escalation by consecutive months of failure.
- **KPI / Underlying Regulation** — escalation by the count of violations within a rolling window.

1.5. What This Document Sets vs. What the Order Sets

- **The document** fixes the structure: what is measured, how, in which period, and with what consequences. Signed once.

- **The Order** sets the actual numeric values for each month: the individual Sales Plan, the KPI quotas, the limits, and the parameters of the disciplinary scale.

02 Composition of the Monthly Order

The monthly Order from the Head of the Sales Department sets, for each calendar month:

1. Sales Plan

- Plan revenue in USD for the employee.
- Plan number of new clients broken down **by each product / tariff**.
- List of mandatory products (those for which the Plan must be met without exception).

2. KPI Standards

- Concrete values for "Activity" (tasks/day, meetings/week, new deals/month).
- Concrete intervals for "SLA" where the Order defines them (e.g., time to first touch on a new Lead).
- Limits for permissible deviations under "Pipeline Hygiene" and "Quality of Work".

3. Parameters of the Disciplinary Scale (Section 7.2)

- Length of the rolling window for the violations counter.
- Violation count thresholds for each of the 5 steps of the scale.

2.1. Publication Date

The Order is published in Zoho People **no later than the 1st business day** of the month it applies to. Until a new Order is published, the values from the previous Order remain in effect.

2.2. Acknowledgement

Every Sales Manager must acknowledge the Order (checkbox in Zoho People) within **2 business days** of its publication.

2.3. Force of the Order

The Order has the same binding force as the present document.

03 KPI Standards Structure

3.1. "Activity" Group

Metric	Period	Description
Closed tasks	day	Tasks closed with the Description field filled (Underlying Regulation 4.1). "Set Next Step" counts when, on closure, a real next task on the Deal has been created.
New deals in Sales	month	A Deal in the Sales Manager's Owner that first entered the Sales pipeline and advanced at least one stage during the month.
Qualified meetings	week	New meetings at stage Discovery / QLF / Demo or beyond, marked in CRM as "Held" with a filled Result / Notes.

3.2. "Response SLA" Group

Metric	SLA	Description
First touch on a new Lead / Deal in Owner	set by the Order	During working hours — close the first task or take the inbound within the interval set by the Order. Outside of working hours — within the first business hour.
Missed call callback	15 minutes	Per Underlying Regulation 9.1.4 — after becoming available.
Reply to a client on WhatsApp (via Zoho CRM)	5 minutes	During working hours. Personal WhatsApp is prohibited by Underlying Regulation 5.2.
Reply to a client by Email	4 hours	Per Underlying Regulation 9.3 — during working hours.
Logging activity result in CRM	30 minutes	After completing a client activity (call, meeting, email, message).

3.3. "Pipeline Hygiene" Group

Metric	Period	Description
Overdue tasks	continuous	Overdue tasks must not exist at all — neither during the day nor at end of day. Each occurrence is a violation.
Open tasks at end of day	day	At end of day no overdue and no tasks scheduled for today may remain. All today's tasks are closed with a result, or closed with a postponement reason and a fresh task created for the next day.
"Abandoned" Deals	day	An active Deal without an open task for the current or next business day is a violation (Underlying Regulation 4.5).
"Set Next Step" closed within 24 hours	day	The "Set Next Step" task is closed within 24 hours of creation, after a real next task has been set.
Mandatory field completeness	per deal	All mandatory fields for the current Pipeline stage are filled to 100% on every active Deal (Underlying Regulation 6.3).
Duplicates	per occurrence	Creating a duplicate Account / Contact / Deal is a violation.

3.4. "Quality of Work" Group

Metric	Period	Description
Closed Won documentation	per deal	Full set of documents in Attachments: completed questionnaire, signed SLA / SOW, payment confirmations.
Deal result write-up	per deal	Closed Won / Disqualified/Rejected — a summary in the Deal's Description: what happened, what worked or did not, takeaways.

Metric	Period	Description
Manager review score	month	Once a month the direct supervisor performs a sample review of calls and notes. Scale 1–5 on: preparation, conversation handling, objection handling, follow-up, accuracy of CRM data.

3.5. Conversions (informational)

Sales pipeline stages (Layout "Sales" in Zoho CRM):

Assigned/Outreach → Discovery / QLF / Demo → Docs Request → Docs Pending → Pre-Compliance Check → Offer Preparation → CFO Pricing Approval → Offer Sent & Follow-up → KYB Invoiced → Compliance Review → SLA/SOW Signing → Setup Fee Invoiced & Awaiting Payment → Closed Won (or, in parallel — Disqualified/Rejected).

Conversions across these stages are **tracked on the Sales Manager's and the supervisor's dashboards** as pipeline diagnostics. However:

- The Sales Manager's goal is **meeting the Sales Plan**, not the conversions themselves.
- **Conversions are not subject to disciplinary action.**
- The quality of the inbound leads is not the Sales Manager's responsibility.

04 Sales Plan Structure

4.1. Composition of the Plan

The monthly Sales Plan is set in the Order and consists of:

1. **Plan revenue in USD** — the total Closed Won amount for the employee.
2. **Plan number of new clients per product / tariff** — for each product on Vault's current price list.
3. **List of mandatory products** — those for which the Plan must be met without exception.

4.2. What Counts as Plan Achieved

The Sales Plan is considered **met** for the month when the employee has:

- Reached the plan revenue in USD, **AND**
- Met the client-count plan for **every** mandatory product.

Failing either condition is a Plan failure. The Plan is reckoned against Closed Won deals dated within the calendar month (Stage = Closed Won).

4.3. What Counts as Plan Overachieved (for Section 7.3)

The Sales Plan is considered **overachieved by 20% or more** when the actual revenue **and** the actual client count for every mandatory product **simultaneously** exceed the plan by 20% or more.

05 Source of Data and Calculation

5.1. Source

All metrics are pulled automatically from Zoho CRM Dashboards (Sales KPI Monitor → Sales Manager). Manual adjustments to the calculation are prohibited.

5.2. Transparency

- The Sales Manager has access to a personal real-time dashboard.
- A monthly report is sent to the employee in Cliq no later than the **3rd business day** of the following month. The report covers separately: the Sales Plan status, the violations status, and the current position on the 7.2 counter.

5.3. Disputing the Calculation

- A disagreement is raised by filing a Zoho Desk ticket (type: **KPI Dispute**) within **5 business days** of receiving the report.
- After 5 business days the calculation is considered accepted.

06 Relation to Bonus

The actual size of the bonus, the formula, and the conditions of payment are set by the individual agreement between the employee and the company and are not fixed in this document. Withholding of the bonus is possible as one of the measures under Section 7.2.

07 Accountability

7.1. Sales Plan Scale (by consecutive months)

Step	Trigger	Measure
1	First month with a failed Plan	Written reprimand — placed in the employee’s record in Zoho People with a specific note: which plan target was missed and by how much.

Step	Trigger	Measure
2	Second consecutive month with a failed Plan	Termination of the contractor agreement at the company's initiative.

A single full month with the Plan met resets the consecutive-failure counter.

7.2. KPI / Underlying Regulation Violations Scale (by count)

Every recorded violation of the KPI Standards (Section 3) or of the underlying Regulation is added to a **rolling window**. The length of the window and the count thresholds for moving to each step are set by the Order.

Step	Trigger	Measure
1	First threshold reached	Verbal warning with a record in Cliq and in the employee's profile.
2	Second threshold reached	Written reprimand listing the violations.
3	Third threshold reached	Withholding of the monthly bonus with a stated rationale.
4	Fourth threshold reached	Second written reprimand .
5	Fifth threshold reached	Termination of the contractor agreement .

Steps 1–5 are climbed sequentially. Recorded warnings and reprimands stay in the employee's profile for **12 months** and may be considered in subsequent reviews.

7.3. Plan Overachievement as a Mitigating Factor

If, for the month:

- The Sales Plan is **overachieved by 20% or more** (see 4.3), **AND**
- KPI / Regulation violations have been recorded in the same month,

— then the violations of that month are **not added** to the 7.2 counter. At the same time:

1. The recorded violations are flagged in the employee's profile as **"deferred"** (with type and date).
2. Should **new violations** be recorded over the **next 90 days**, the 7.2 escalation **skips one step** — for example, on reaching the first threshold the Step 2 measure (Reprimand) is applied directly instead of the Step 1 measure (Verbal warning).
3. A single full calendar month with no new violations and no deferred flags clears the deferred flags.

The intent: an overachieved Plan is an amnesty, not an indulgence. Continued violations after the amnesty meet a stricter response.

7.4. Right to Submit Explanations

Before each step from the second (Reprimand) onward, the employee is given **3 business days** to submit a written explanation. The explanation is taken into account but does not erase the recorded fact when it is supported by the CRM data.

08 Final Provisions

8.1. Relation to the Underlying Regulation

The present Standards are an annex to the **Zoho Ecosystem Usage Regulation for the Sales Department**. Behavioural violations not covered here are handled under the underlying Regulation.

8.2. Acknowledgement

Every Sales Manager confirms acknowledgement of these Standards by ticking the corresponding checkbox in Zoho People. Until the acknowledgement is recorded, access to the Sales CRM pipeline is not granted.

8.3. Amendments

- **The structure** (Sections 2–4), **the measurement procedure** (Section 5), and **the accountability scale** (Section 7) are reviewed as needed and republished in Zoho People with mandatory re-acknowledgement.
- **The numeric values** are changed by the monthly Order and **do not require re-signing** of the present document.
